

Payroll Launch Suite™

Payroll LaunchSuite

Accelerates payroll-specific implementation and testing procedures

Payroll LaunchSuite is a series of software applications that reduces the time and cost associated with deploying SAP by accelerating payroll-specific implementation and testing procedures.

Implementing SAP HR and customizing the payroll functionality to meet your specific needs can be a time-consuming and costly process. Companies save a significant amount of time and money by using Payroll LaunchSuite to simplify and accelerate SAP HR and Payroll implementation, testing and support procedures while it reduces custom development and support expenses.

Payroll LaunchSuite includes:

Payroll ParallelWorkbench –

This solution informs you of payroll inconsistencies and allows you to quickly resolve issues prior

to Go-Live during upgrades and support package testing. ParallelWorkbench also ensures that your SAP HR system delivers payroll results that meet your business requirements. This solution identifies potential differences in payroll data and results across legacy solutions or other SAP systems in a user-friendly interactive format.

Payroll AuditWorkbench – It is critical that payroll information within SAP is accurate prior to launching the system. Payroll AuditWorkbench

Features:

- ▶ Enhance SOX compliance with effective audit controls
- ▶ Minimize payroll & tax calculation errors
- ▶ Catch employee overpayments and deter fraud
- ▶ Resolve payday payroll issues in a timely and effectively manner
- ▶ Reduce HR workload by reducing rework
- ▶ Enable HR Users to be self sufficient for HR and Payroll reporting and auditing

Payroll Launch TM

SUITE

simplifies the payroll data audit and verification process and informs you of potential payroll inaccuracies prior to completing the payroll process. By validating taxes, arrears, retro calculations and payroll checks before they are paid to employees, you can avoid payday corrections, over-payments, claims and even fraud.

DataArchitect – Data Architect enables organizations to quickly and easily generate realistic employee test data and test business scenarios to greatly improve SAP HR testing results. Organizations are also able to copy and “anonymise” real production data for development and training purposes, saving you a significant amount of development hours.

HR DataBroker – Tailoring SAP HR interfaces to meet your company’s specific needs is typically a time consuming and expensive process. HR DataBroker replaces confusing custom outbound interfaces within SAP with a single user configurable interface, saving you significant customization time and money. Dramatically reduce your IT workload by empowering HR Super Users to create their own reports and make available to others. PA, OM and PY data can be all combined on the same report.

Parallel PayrollAnalyzer – Avoid costly mistakes by thoroughly testing the readiness of your payroll solution prior to Go-Live or Year End updates. Parallel Payroll Analyzer provides the management reports that confirm your readiness.

Technical Specifications:

- Earliest Release: SAP ECC 6.0
- Latest Release: SAP ECC 6.0, EhP4
